

4/11/2020

Dear Chiropractic Patient,

As we continue to monitor the constant evolving CoVid-19 situation and social distancing that is currently affecting our community, I wanted to share some helpful information.

Chiropractic care has been proven to boost your immune system. It is morally and ethically the right choice for us to continue business as usual. What we DO know is that the work that Chiropractors do will help keep people healthier if they choose to utilize regular Chiropractic care. If you are a current patient and do not feel comfortable keeping your appointment at this time, please call us to reschedule.

As we respond to the ever-changing environment, the safety of our patients, staff and Doctor remains our highest priority. We remain committed to providing you with a safe environment in which to receive your Chiropractic care. We are taking protective measures to make your visits as clean, healthy and germ free as possible.

Dr. Keri is using extreme caution with patient care and is implementing vigilant hygiene routines for the patients, staff and the equipment. She is wearing a mask when patients are in the office. She is disinfecting each adjusting table in between patients as well as practicing frequent hand washing procedures and using hand sanitizer throughout the day. We are asking for everyone to call ahead and schedule an appointment (no walk ins) in order to help us control the flow of traffic. We are wiping hard surfaces throughout the day and diffusing tea tree essential oils in the office to assist with cleansing the air and these are known to have a positive effect on respiratory health. We will no longer use our IPAD self-check in device, so please check in upon arrival at the front desk. This week any patient scheduling an appointment will be **required** to wear a mask into the office as well per the governor's recommendation on 4/15/2020.

We will continue to monitor our daily operation procedures and are following clinic protocol outlined by the World Healthcare Organization and leading authorities within the Chiropractic profession.

**In following with CDC guidelines: we ask that if you aren't feeling well (or are bringing a child with you that isn't well), have a fever or cough or respiratory illness at this time, please call the office to reschedule your visit to a future date once you are healthy again. We ask for you to respect and follow this guideline so that we may continue to provide chiropractic care to as many as people as possible during the time.

I would like to reiterate again, that maintaining proper spinal alignment will strengthen your nervous system which in turn improves one's immune system and assists your body in fighting off diseases. We are here to provide essential care to keep our community healthy!

Thank you for your patience and patronage during this time.

Dr. Keri Freshour
